WORK EXPERIENCE

Java Backend Developer

Panamax Infotech Ltd

11/2022 - Present

Tech Stack - Java · Spring Boot · MySQL · Redis ·
Apache Kafka · Apache ZooKeeper · Microservices

Achievements/Tasks

- In my role at a product-based financial solutions company, I specialized in developing key functionalities such as Goal Based Savings, Bill Payment, Target Management, and Loyalty & Rewards systems. Using Java and Spring Boot frameworks. Additionally, I spearheaded the creation of a microservice, leveraging my expertise in understanding and translating business requirements into tangible technological solutions that added significant value to the company's offerings.

Full-Stack Developer

Tata Consultancy Services

11/2020 - 11/2022

Tech Stack - Vue.js · Java · Spring Boot · MySQL · Jenkins ·
Software Development · GitHub · AWS ·
HTML5 · CSS · Web Development · JavaScript

Achievements/Tasks

- I led the team in developing a web-based application that offers a user-friendly interface and significant performance improvements over their previous application. By analyzing the client's business requirements, I identified a green belt opportunity and implemented automation, resulting in approximately \$130,000 in annual savings for them.

Full-Stack Developer

MAS Financial Services Limited

01/2020 - 05/2020

Tech Stack - Python · MySQL · HTML5 · CSS · JavaScript

Achievements/Tasks

- Developed a Loan Disbursement Web Application for the company.

Full-stack Developer Intern

Bhaskaracharya Institute For Space Applications and
Geo Informatics MAS Financial Services Limited

06/2019 - 12/2019

Tech Stack - Spring Boot · Hibernate · HTML5 · CSS · JavaScript

Achievements/Tasks

- Developed a web application, which was a replica of ImageJ, which is a desktop application for image processing.

SKILLS

Java Python VueJS JavaScript Redis

Data Structure & Algorithm SpringBoot Github

HTML CSS Amazon Web Services (AWS)

Apache Kafka Apache Zookeeper
